

# EMPOWERING RCC COMPETENCIES THROUGH INTERPROFESSIONAL TRAINING – ERCCI MOOC

There are substantial concerns across Europe in different welfare systems about the capability of RCCs to help and support children and youth. This concern is directly linked to the (insufficient) training background and (in)stability of the RCC workforce.

ERCCI project is reflecting the questions:

- 1) What competencies are considered relevant for residential staff?
- 2) How RCC staff can best be trained and empowered in their demanding work?
- 3) How to transform learning and teaching digital?

James, S., Wilczek, L., Kilian, J., Timonen-Kallio, E., Bravo, A., del Valle, J., F., Formenti, L., Petrauskiene, A., Pivoriene, J., and Rigamonti, A. (2021). **A Comparative Analysis of Residential Care - A Five-Country Multiple Case-Design Study**. Child and Youth Care Forum.

ERCCI MOOC is gathering the main theoretical and practical aspects that research has identified into pedagogically organized set of learning resources and opportunities.

MOOC is shared in Oct 2021 with open licence for all interested in developing high quality RCC.

\* to download and use for non-commercial reasons, authors and contributors need to be quoted

Competence areas, modules in ERCCI MOOC:

- each module includes video lectures, tests, texts and articles to read, quizzes, self-evaluation and other learning activities
- easy to integrate to curricula and variety of degrees
- can also used as reflection material for professional teams in RCC
- useful as an introduction material for newcomers in RCC work

CONSORTIUM OF EXPERTS:

Eeva Timonen- Kallio, Tiina Pelander (Turku University of Applied Sciences, Finland)

Jorge Fernández del Valle, Amaia Bravo (University of Oviedo, Spain)

Alina Petrauskiene, Brigita Kairiene (University of Mykolas Romeris, Lithuania)

Laura Formenti, Alessandra Rigamonti (University of Milano Bicocca, Italy)

Sigrid James, Juri Kilian (University of Kassel, Germany)

International student group as future users testing and evaluating the contents and learning material.
